

## 2024 Natchez John Doe

On March 14, 2024, skeletal remains were discovered by an officer beneath a pile of leaves in a shallow grave in Natchez, Mississippi. The remains are believed to belong to an adult male, whose age could not be definitively determined. The man stood between 5'9" and 6'4". An ID card found near the remains suggests the individual may have been a 70-year-old male, but no official identification has been made.

The case was entered into the National Missing and Unidentified Persons System (NamUs) as UP124871. Despite investigators' efforts, the individual has not been identified. The uncertainty around his identity has left the case unsolved and the community searching for answers.
